passed: myfoo not defined
TESTING STARRAY

— properties/sub-structures, one definition at a time —
STtest
passed: dup detected

STtestX
passed: new done!

adding struct ZX to STtest.TT
passed: defined correctly!

STtest.TT Zy=TT Zy-default
passed

STtest.TTT Zy(err)=TT Zy-default
passed: err detected

— Extending def structure of an already instantiated starray —
Note: it will loop if not fixed!
— Fixing it —
Note: STtest def \show shall appear in logs (if fixed)
Note: STtest terms \show shall appear in logs (if fixed)

Note: STtest.SSX (err/warning) shall be in logs:

— testing term_syntax function —
STtest.TT.ZXx (err)
passed: err detected

STtest.TT.ZX (correct)
passed

— Texting expandable predicates and command —
passed: myfoo isn't defined
passed: myfoo isn't defined
passed: STtest.TT.ZX is a starray

executing term syntax:n (no output)

This is ZXa:«TT Zx ZXa-default» (using 'parsed' one)

— expandable cnt/iter commands —
The current cnt:2(using 'parsed' one)

passed: cnt isn't 0

The current iter:2(using 'parsed' one)

passed: iter is 2

passed: myfoo not a prop of
passed: ZXa is prop

passed: ZXa is true

— testing get_prop functions —
Note: This is (default) 'X' property fromSTtest[hah] term:

X-default

Note: Same with a token-list variable
X-default

Note: Same with 'branching'
X:X-default
passed: X found correctly

Xt:
passed: Xt don't exist

Note: (same) testing \...if_in:
passed: X exists
passed: Xty don't exit

— Testing iter functions —
Current STtest iter:
Note: direct access:2
Note: using a tmp var:2
Note: reseting iter
iter:1
Note: next iter
iter:2
Note: next iter
iter:2
Note: set iter->5
iter:2
Note: set iter->0
iter:1

— Testing iter functions with branching —
Current STtest iter:
passed: got: 1
iter from STtestY (err):
passed: syntax err OK
Note: reseting iter
passed
iter:1
Note: next iter
passed
iter:2
Note: next iter
passed: 'saturated'
iter:2
Note: set iter->5
passed: 'over'
iter:2
Note: set iter->0
passed: 'under'
iter:1
Note: set iter->2
passed
iter:2

— Testing cnt functions —
Current STtest cnt:
Note: direct access:2
Note: using a tmp var:2
— Testing cnt function with branching —
Current STtest cnt:

passed: got: 2
Current STtestX cnt:
passed: got: 0
Current STtestY cnt:
passed: non existant

— Testing _if_in function —
passed: X found
passed: G not found
— Testing _term_syntax function —
STtest[2].TT is:
passed: correct
STtest[1].TT is:
passed: wasn't instantiated
STtest[1].GG is:
passed: not correct

— Testing (g)set_prop functions —
STtest[2].TT.Z current value: TT Z-default
STtest[2].TT.Z new value: newZ value

— Testing (g)set_prop inside a group —
STtest[2].TT.Z inside: newZ inside group
STtest[2].TT.Z ouside: newZ value
STtest[2].TT.Z inside gset: newZ gset inside group
STtest[2].TT.Z ouside: newZ gset inside group

— Testing (g)set_prop functions —
STtest[2].TT.Z current value: newZ gset inside group
STtest[2].TT.Z new value: newZ value

— Testing (g)set_prop inside a group —
STtest[2].TT.Z inside: newZ inside group
STtest[2].TT.Z ouside: newZ value
STtest[2].TT.Z inside gset: newZ gset inside group
STtest[2].TT.Z ouside: newZ gset inside group

— Testing (g)set_prop functions with branching —
STtest[2].TT.Z current value: newZ gset inside group
passed: new value: newZZZZ value

— Testing (g)set_prop inside a group —
passed: new value: newZ inside group
STtest[2].TT.Z ouside: newZZZZ value
passed: new value: newZ gset inside group
STtest[2].TT.Z ouside: newZ gset inside group
setting:STtest[1].TT (err, not instantiated)
passed: correct, no instance

— set_prop:nnV inserting a sequence as a property —
Note: the 2 (equal) sequences shall be in log (\show)

— defining/setting from keyval —
— setting from keyval with branching —
passed: correct
student definition:
>{student} struct =>
